For Immediate Release

**INDIAN CREEK WATERSHED MANAGEMENT AUTHORITY
WORKING TOWARDS WATER QUALITY GOALS**

Media Invited To Attend August 13th Event

If you missed our last lunch, learn, and input session attended by both Senator Rob Hogg and Representative Charles Isenhardt, and covered by KGAN CBS 2 (<http://bit.ly/1oNfogA>), make sure you attend this one.

The Indian Creek Watershed Management Authority is collaborating with a variety of groups to generate ideas, plans, and actions to protect our communities and the Dry, Indian, and Squaw Creeks. Tomorrow, August 13th, at 11:00 a.m. the group will be hosting the Indian Creek Watershed Plan – Water Quality Goals: Lunch, Learn & Input Session and media are invited to attend.

At the event you will learn about the Indian Creek Watershed water quality monitoring results and provide input on suggested goals and implementation strategies for the Plan. These goals will form the basis for funding requests through future grant proposals.

For more information, please view our event agenda at tinyurl.com/phmaaou, or to rsvp to the event, please email jennifer.fencl@ecicog.org.
